## **FOREWORD**

In the early 18th century, J.S. Bach composed his "Well-Tempered Klavier" with two purposes in mind; to show that the newly developed well-tempered system of tuning would support pieces composed in every key and also as a pedagogical treatise on fugal counterpoint for his children.

The "Well-Tempered Violin" is inspired by these concepts. These pieces were composed in order to introduce every key to the young violinist. This is not a system to introduce reading, but rather a system that will strengthen reading skills.

Within this framework, the popular dances and forms of the Baroque era are represented throughout the manuscript. A simple and straight-forward text explains each piece and hopefully will enlighten and inform the student about this important repertoire.

It is suggested, especially further into this book, that the teacher preface each piece with the corresponding scale and arpeggio.

## 1. CANON in C Major

- A. A canon is a musical composition where a melody in one voice is imitated in another voice.
- B. The structure of this piece is based on sonata form. There are three basic sections in Sonata form: Exposition, Development, and Recapitulation.
  - 1. EXPOSITION. This is the first section in sonata form where the various themes are presented or exposed. Here, the main theme consists of the first two measures.
  - 2. **DEVELOPMENT.** This section follows the exposition and is usually marked by a double bar. Here, the themes that were presented in the exposition are developed and put back together in different ways.
  - 3. RECAPITULATION. In this third section, the exposition is loosely repeated and remains in C major.
- C. Melodic inversion happens when a previously stated melody is turned upside down, keeping the same intervals but in the opposite direction. Compare the first two measures of the piece and the first two measures of the development.

## 5. PERPETUAL MOTION in F Major

A perpetual motion is a piece using the same rapid motion without stopping. The most famous perpetual motion is probably the one by Paganini, "Moto Perpetuo".

This perpetual motion is also a canon which only waits one beat before the next voice enters.
