CHAPTER ONE: THE BEBOP SCALE

The Bebop Major Scale (Examples 1 - 2)	6	
Bebop Major Scale Riffs (Examples 3 - 5)	8	1A - 1C
Bebop Major Scale Chords (Example 6)	9	
Major 7(13) Chord Riffs (Examples 7 - 9)	10	2A - 2C
Major 7(13) Arpeggios (Example 10)	11	
Major 7(13) Arpeggio Riffs (Examples 11 - 13)	13	3A - 3C
The Bebop Minor Scale (Examples 14 - 15)	14	
Bebop Minor Scale Riffs (Examples 16 - 18)	16	4A - 4C
Bebop Minor Scale Chords (Example 19)	17	
Bebop Minor Scale Chord Riffs (Examples 20 - 22)	18	5A - 5C
Bebop Minor Arpeggios (Example 23)	19	
Bebop Minor Arpeggio Riffs (Examples 24 - 26)	20	6A - 6C
The Bebop Dominant 7 Scale (Examples 27 - 28)	21	
Bebop Dominant 7 Scale Riffs (Examples 29 - 31)	23	7A - 7C
Bebop Dominant 7 Scale Chords (Example 32)	24	
Bebop Dominant 7 Scale Chord Riffs (Examples 33 - 35)	25	8A - 8C
Bebop Dominant 7 Arpeggios (Example 36)	26	
Bebop Dominant 7 Arpeggio Riffs (Examples 37 - 39)	27	9A - 9C
Rhythm Changes (Examples 40 - 43)	28	
Summary Solo 1 (Example 44)	32	
Summary Solo 2 (Example 45)	34	11

CHAPTER TWO: THE LYDIAN AUGMENTED SCALE

The Lydian Augmented Scale (Examples 46 - 47)	36	
Lydian Augmented Scale Riffs (Examples 48 - 50)	38	12A - 12C
Lydian Augmented Chords (Example 51)	39	
Lydian Augmented Chord Riffs (Examples 52 - 54)	40	13A - 13C
Lydian Augmented Arpeggios (Example 55)	41	
Lydian Augmented Arpeggio Riffs (Examples 56 - 58)	43	14A - 14C
Summary Solo 3 (Example 59)	44	
Summary Solo 4 (Example 60)	46	16

CHAPTER THREE: THE ALTERED DOMINANT SCALE

The Altered Dominant Scale (Examples 61 - 62)	48	
Altered Scale Riffs (Examples 63 - 65)	51	17A - 17C
Dominant 7(5) Chords (Example 66)	52	
Dominant 7(5) Chord Riffs (Examples 67 - 69)	53	18A - 18C
Dominant 7(5) Arpeggios (Example 70)	54	
Dominant 7(5) Arpeggio Riffs (Examples 71 - 73)	56	19A - 19C
Dominant 7(9) Chords (Example 74)	58	
Dominant 7(9) Chord Riffs (Examples 75 - 77)	58	20A - 20C
Dominant 7(9) Arpeggios (Example 78)	60	
Dominant 7(9) Arpeggio Riffs (Examples 79 - 81)	62	21A - 21C
Tritone Chord Substitution (Examples 82 - 85)	63	22A - 22B
Summary Solo 5 (Example 86)	66	
Summary Solo 6 (Example 87)	69	24

CHAPTER FOUR: THE DOMINANT 7(\flat 9, \flat 13) SCALE

The Dominant 7(\flat 9, \flat 13) (Examples 88 – 89)	74
Dominant 7(\flat 9, \flat 13) Scale Riffs (Examples 90 – 92)	76 25A – 25C
Dominant 7(\flat 9, \flat 13) Chords (Example 93)	77
Dominant 7(\flat 9, \flat 13) Chord Riffs (Examples 94 – 96)	78 26A – 26C
Dominant 7(\flat 9, \flat 13) Arpeggios (Example 97)	79
Dominant 7(\flat 9, \flat 13) Arpeggio Riffs (Examples 98 – 100)	83 27A – 27C
Triads Found Within the G7(\flat 9, \flat 13) Scale (Example 101)	84
Triad Riffs (Examples 102 – 104)	85 28A – 28C
Non-diatonic Triads (Examples 105 – 106)	86
Non-diatonic Chord Riffs (Examples 107 – 109)	87 29A – 29C
Summary Solo 7 (Example 110)	88 30
Summary Solo 8 (Example 111)	91 31

CHAPTER FIVE: THE AUGMENTED SCALE

The Augmented Scale/Minor 3rd – Half-Step (Examples 112 – 113)	94
Augmented Scale Riffs (Examples 114 – 116)	96 32A – 32C
Augmented Scale Chords (Example 117)	97
Augmented Scale Chord Riffs (Examples 118 – 120)	98 33A – 33C
Arpeggio Riffs (Examples 121 – 123)	99 34A – 34C
The Augmented Scale/Half-Step – Minor 3rd (Examples 124 – 125)	100
Augmented Scale Riffs (Examples 126 – 128)	102 35A – 35C
Augmented Scale Chords (Example 129)	103
Augmented Scale Chord Riffs (Examples 130 – 132)	104 36A – 36C
Arpeggio Riffs (Examples 133 – 135)	105 37A – 37C
Chromatic Approach (Examples 136 – 138)	106 38A – 38C
Summary Solo 9 (Example 139)	107 39
Summary Solo 10 (Example 140)	108 40
Summary Solo 11 (Example 141)	109 41

CHAPTER SIX: THE PHRYGIAN MODE

The Phrygian Mode (Examples 142 – 143)	112
Phrygian Mode Riffs (Examples 144 – 146)	114 42A – 42C
Phrygian Chords (Example 147)	115
Phrygian Chord Riffs (Examples 148 – 150)	116 43A – 43C
Minor 7(\flat 9) Arpeggios (Example 151)	117
Minor 7(\flat 9) Arpeggio Riffs (Examples 152 – 145)	120 44A – 44C
Summary Solo 12 (Example 155)	122 45
Summary Solo 13 (Example 156)	124 46

APPENDIX 1: QUARTAL CHORD STRUCTURE

Examples 157 – 159	.126
--------------------	------

APPENDIX 2: THE COLTRANE MATRIX

Examples 160 – 162	.128
--------------------	------

APPENDIX 3: MELODIC MINOR MODES

Examples 163 – 164	.130
--------------------	------

APPENDIX 4: HARMONIC MINOR MODES

Example 165	.132
-------------	------

CHAPTER ONE: Bebop Scale

Players such as Charlie Parker and Dizzy Gillespie refined the bebop scale. It had been used prior to these players but had not been formally worked out. **The bebop scale is basically a way to get eight notes out of a seven-note scale.** Why did players want to do that? A lot of bebop is played at fast tempos. The soloist would sometimes string long groups of eighth notes together. It's hard to navigate long scale-like lines made of seven notes. By adding one chromatic note you could have eight notes to the measure, which worked out great in 4/4 time (eight eighth notes per measure). Through analyzing solos of the great bebop players, you will discover that they did certain chromatic moves on the same scales in a fairly consistent way. These are what we call the bebop scales.

Transcription is the best way to get in a player's head. Remember, this book is just one person's take on various topics of jazz improvisation. I want to share my observations with you, but I also want to encourage you to explore every area for your self. You will probably discover some new way of looking at and understanding jazz, which you then can share with others.

I am going to discuss three different bebop scales: major, minor, and dominant 7. Remember that the bebop scales are an attempt to organize a very loose way of playing scales, so don't be surprised to find contradictions in your exploration of these scales. They are definitely not written in stone!

The Bebop Major Scale

The bebop major scale is an Ionian mode (same notes as the major scale) with an added sharp 5th. The sharp 5th is used as a chromatic passing tone. These fingerings lets the player achieve eight notes per bar. The examples will use the C major bebop scale.

Example 1 is a bebop major scale in C:

A musical example showing a bebop major scale in C. The top part is a staff with a treble clef and a '4' time signature. It contains a series of eighth-note strokes. The bottom part shows a guitar neck with three strings labeled T (Top), A (Middle), and B (Bottom). Fret numbers are indicated below each string: 3, 0, 2, 3 for the B string; 0, 1, 2, 0 for the A string; and 1 for the T string. This represents a scale starting on C, going up to G, then back down to C again.

Following are some fingerings using the bebop major scale. Notice that they're mostly three or four notes per string. This is a good way (but not the only way) to learn scale fingerings. These fingerings will get you moving more horizontally across the fingerboard as opposed to vertically. I have found it makes my scale-like lines a little more legato.

Example 2 shows the bebop major scale fingerings across the fingerboard (C major):

A musical example showing a bebop major scale in C across the fingerboard. The top part is a staff with a treble clef and a '4' time signature. The bottom part shows a guitar neck with three strings labeled T (Top), A (Middle), and B (Bottom). Fret numbers are indicated below each string: 3, 1, 3, 4, 5 for the B string; 2, 3, 5, 6 for the A string; and 2, 4, 5, 3 for the T string. This represents a scale starting on C, going up to G, then back down to C again, with fingerings designed for horizontal movement.

CHAPTER THREE:

The Altered Dominant Scale

(7th Degree Melodic Minor Scale)

The mode built on the 7th degree of the ascending melodic minor scale is known as the altered dominant scale, the Super Locrian mode, or the diminished whole-tone scale. Previously, when I labeled the modes of the melodic minor scale, I called the 7th degree Super Locrian. I did this so the student might relate it to the modes of the major scale (the 7th mode of the major scale is the Locrian mode). The term **altered dominant scale** works especially well since this scale contains every alteration on a dominant 7 chord ($\#5$, $\flat 5$, $\#9$, $\flat 9$). The term **diminished whole-tone** also works because the first tetrachord (first four notes of the scale) spell a diminished scale, and the second tetrachord spells a whole-tone scale.

Once again I'd like to stress the reason for not thinking that you play over an altered C7 chord by playing a D \flat melodic minor scale. In theory this works, but in practice it is wrong. A C7 tonality is built around the notes C, E, and B \flat . A D \flat minor tonality is built around the notes D \flat , F, and A \flat . It's easier to focus on the C7 chord tones if you're thinking in terms of C, not D \flat . Now how about if you start using tritone substitutes; every time you go to play a flat 5 sub you'd have to think of a minor scale a half step away. This just gets all too confusing and non-harmonic. If you are going to play C7 altered, learn the scale, arpeggios, and chords and go! There is no substitute for the real thing.

The arrangement of whole and half steps in the altered dominant scale (from here on let's just call this the "altered" scale) is:

H-W-H-W-W-W-W

Example 61 shows a C altered scale in first position.

I have picked the C altered scale for our examples. Again, note that it is my inclination to work in flat keys because this is where most of jazz lives, thanks to the horn players.
