Muzio Clementi (1752-1832)

Engraving by T. Hardy

Muzio Clementi was certainly one of the most important figures in the development of modern piano style. Greatly admired by Beethoven, who is said to have had greater respect for him as a pianist than for Mozart, Clementi is known as the founder of the legato style of playing.

Clementi was the author of an immensely successful piano method, which he published himself, called *An Introduction to the Art of Playing on the Pianoforte*. Beethoven recommended and endorsed this method, and it is known that Chopin used it with his students. The scope of its influence is inestimable, since Clementi's life span embraced the time from Handel through that of Mendelssohn.

Most of the pieces in this book (all in their original form, unsimplified) are taken from this famous method book (the 11th and final edition, "with great improvements"), or from his supplement to the method ("Second Part of Clementi's Introduction to the Art of Playing on the Pianoforte . . . calculated for the greatest improvement of the student"). The only exceptions are the *Adagio* (2nd movement) from *Sonatina*, Op. 36, No. 3 (on page 5), which was taken from the sixth and final edition of the *Sonatinas* ("with considerable improvements by the author"), and the *Waltz* (on page 21), taken from his collection of waltzes, Opus 39.

WALTZ

"How d'ye do? —Very well, I thank you."

This waltz was taken from Clementi's own publication of this opus, entitled Twelve Waltzes for the Pianoforte, with an accompaniment for a tamburino & triangle.
