NOTES TO THE CONDUCTOR

Because of the persecution and forced assimilation of Native Americans for several generations, much of their music and other traditions have been lost. Fortunately, some music specific to certain cultures still flourishes. Another type of music style heard today is of a collective, intertribal nature loosely based on traditions originating with people indigenous to the Northern Plains and melded with European influences. In this same eclectic spirit, melodies in this piece were fashioned using styles of traditional as well as modern intertribal music.

Unornamented durations are uncommon in Native American music, and sustained pitches are often audibly pulsed using subdivisions of the beat. This has been notated with the ties and accent marks in this piece, and should be played by pulsing the notated rhythm using an exaggerated, clearly audible diaphragm vibrato.

The night sounds used at the beginning and end of the piece are important as the ethnomusicologist Natalie Curtis writes: “[In Native American music] [h]armony is lacking; but the life and art of the Indian are so linked with nature that it is to be questioned whether the sounds of the nature-world do not supply to these singers of the open a certain unconscious sense of harmonic background.” Please balance the sound of the recording so that it properly accompanies the flute soloist and percussion.

To achieve stylistic authenticity, please try to observe the percussion requirements with the specified number of players.

Out of respect to customs and traditions, the vocals used in the piece were chosen merely to imitate some of the language patterns of these people; thus, the text has no religious or historical connotation.

It is my hope that this composition will honor Native American cultures while introducing students to some of the general characteristics of America's oldest known indigenous music.
