NOTES TO THE CONDUCTOR

Keep the tempo at a medium swing as marked. Any faster, and the chart will sound rushed. Articulations are always important, and this chart is no exception. The rooftop accents (^) should be detached, but not too short (think daht). Make sure to remind the winds that the last eighth note in a group should always be short.

All saxophone solis should be smooth, lyrical, and have a good blend. When the melody is in unison, there is no need to play loud. This rule applies to the other wind sections as well. Assuming that the instruments are fairly well in tune, the unison will sing by itself. However, when the saxes break into harmony, make sure that the players listen and blend. It helps to practice in a circle or arc so that individuals within a section can hear each other. Each player must learn to fit his or her part into the section blend. Play and sustain each note if necessary, until it becomes second nature. The second alto should support the lead alto, and mirror each nuance without being overpowering. This is true for the other saxes in the section, but it is especially critical for the second alto. Dynamics should increase accordingly, growing as the melodic line rises and backing off as it descends. Ask the players to mark releases, because a clean release will make the band sound mature and more professional.

The brass sections have some pops on the “and” of beat 3, as in measures 18 and 20. Keep these figures tight and clean. The rhythm section parts are clearly notated. The guitar player should comp when slashes are written, using three- or four-note chords with a tight, muted sound. Make sure to keep a steady quarter-note pulse.

Please enjoy!
