NOTES TO THE CONDUCTOR

Crank out your Count Basie records for this one because we're talking pure Basie, straight down the middle of the plate. First, find the right tempo—not too fast, not too slow. Then prepare to play with dynamic contrast. That's a device the Basie band used to maximum effect and can help make this chart sound great. After the *ff* intro, settle into a soft statement of the melody at measure 7. Keep it nice, gentle and swinging all the way through the first chorus. Then at measure 37, start to build into a send off into the piano solo. These 5 measures should be loud, but not full out. Save some for the shout chorus yet to come. After the piano solo the tenor sax gets to blow, but the chart still has not become really intense.

After the tenor solo, there is an ensemble passage at measure 75 that starts off easy and stays that way. Keep it light and soft! The band must listen to each other and blend; for example, pay close attention to the laid-back lick at measure 83. If the band plays this figure together, it's a great feeling! The rhythm section must also follow the dynamics in this chart. It's not realistic for a horn section to play soft unless the rhythm section is doing the same. At the bridge things start to build a bit, but it's really just a fake out because after those two big hits on beat 3 and 4 of measure 98, the chart settles right back down again. But a few bars later the band will get to crescendo to the payoff: the shout chorus at measure 107. This should be a great moment of release for the band and for the audience, because after 106 measures things are finally roaring! Now it's time to go for it. Get the air stream moving and blow. To my ear, there is nothing like the Count Basie sound!

I hope you enjoy the chart!
