## NOTES TO THE CONDUCTOR

“My Funny Valentine” is a classic standard performed here as a smooth ballad. Phrasing is critical to a successful performance. The long, curved slur “arch,” which connects several measures of notes, can be compared to a sentence in written language. It indicates a complete musical thought. Just as we don’t normally breathe in the middle of a sentence, it is unusual to breathe during a musical phrase. Shape the phrases. Usually when the notes go higher, the intensity and volume is increased. When the notes descend, the volume and intensity is decreased. Students should always be listening and adjusting according to what they hear.

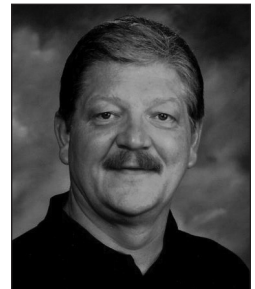

Dynamics are critical. Crescendos should come from the bottom, so players with higher pitched notes should wait until they hear the lower notes getting louder before beginning their crescendo. The soloist should always be heard above the rest of the band. Beginning in measure 18 the lead alto is the soloist until measure 28. The trumpet solo and the alto solo should be equally strong in volume.

The bass part should be played in a legato style so that there are no silences between notes. Any shifts in fingering should be held out until the very last second before changing notes. The changes in tempo should feel relaxed and smooth. The drumset player can “sneak” into the new tempos by setting them up with the cymbal pattern a measure before the new tempo. Eighth notes become equal to quarter notes in measure 40. In measure 76, quarter notes become equal to eighth notes.

Above all else, students should listen to “the big picture” as if they were seated in the audience. Music is what we hear, not what we do! The focus should be on enjoying the music, rather than worrying whether or not things were played correctly.

Enjoy!
