NOTES TO THE CONDUCTOR

This tune has always been played as a ballad; however, for a different feel and interpretation, I have arranged this version in a bossa nova groove.

There is a lot of syncopation in this chart and it is important that the figures be played smoothly and with accurate time. The tenuto markings over many of the notes in the syncopated phrases indicate that the notes be given their full value and connected, but not accented. In this arrangement, there are several rooftop (marcato) accents (▲), so be sure the band plays with a stronger attack and a detached articulation—think “daht.” Avoid clipping notes with the rooftop articulation. A clear example of the effectiveness of well-played rooftop accent is in measure 78. Unison lines in this chart (and any chart) should be played without any vibrato.

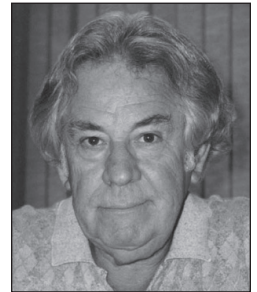

Dynamics are always important. For example, for the crescendo in measures 1, 76 and again in 92, begin these crescendos soft enough to allow enough dynamic energy to build through the entire crescendo—it’s essential to make this line effective.

For the rhythm section, the piano and bass parts are written out. The drum part is a typical guide to indicate basic bossa nova time with ensemble accents and hits. The guitar will have slash marks to indicate comping using three or four note chords in a quarter note pattern. For the best sound ask the guitarist to use medium thickness picks which will give the sound a very bright, acoustic quality and hold the pick loosely between the thumb and index finger.

As always, observe all of the dynamic markings, being careful not to over-power the vocalist. And most importantly, make sure everyone is playing the same version—either high key or low key!

Enjoy!
