

Wynton Marsalis, Managing and Artistic Director, Jazz at Lincoln Center

BONGA (EMPTY TOWN BLUES)

BY DUKE ELLINGTON

As performed by the Duke Ellington Orchestra

Transcribed and Edited by David Berger for Jazz at Lincoln Center

FULL SCORE

This transcription was made especially for Jazz at Lincoln Center's 2012-13 Eighteenth Annual *Essentially Ellington* High School Jazz Band Program.

Jazz at Lincoln Center and Alfred Music gratefully acknowledge the cooperation and support provided in the publication of this year's *Essentially Ellington* music series:

Founding leadership support for *Essentially Ellington* is provided by The Jack and Susan Rudin Educational and Scholarship Fund. Major support is provided by The Con Edison Community Partnership Fund, The Irene Diamond Fund, Alfred and Gail Engelberg, The Ella Fitzgerald Foundation, The Charles Evans Hughes Memorial Foundation, The Mericos Foundation, The Harold and Mimi Steinberg Charitable Trust, and The Surdna Foundation.

ELLINGTON**

jazz

NOTES ON PLAYING ELLINGTON

At least 95% of modern-day large ensemble jazz playing comes out of three traditions: Count Basie's band, Duke Ellington's band, and the orchestrations of small groups. Those young players interested in jazz will be drawn to small groups for the opportunity to improvise and for practical reasons (it is much easier to organize 4 or 5 people than it is 15). Schools have taken over the task (formerly performed by dance bands) of training musicians to be ensemble players. Due to the Basie Band's popularity and its simplicity of style and emphasis on blues and swing, the better educators have almost exclusively adopted this tradition for teaching jazz ensemble playing. As wonderful as Count Basie's style is, it doesn't address many of the important styles developed under the great musical umbrella we call jazz. Duke Ellington's comprehensive and eclectic approach to music offers an alternative.

The stylistic richness of Ellington's music presents a great challenge to educators and performers alike. In Basie's music, the conventions are very nearly consistent. In Ellington's music there are many more exceptions to the rules. This calls for greater knowledge of the language of jazz. Clark Terry, who left Count Basie's band to join Duke Ellington, said, "Count Basie was college, but Duke Ellington was graduate school." Knowledge of Ellington's music prepares you to play any big band music.

The following is a list of performance conventions for the great majority of Ellington's music. Any deviations or additions will be spelled out in the individual performance notes which follow.

1. Listen carefully many times to the Ellington recording of these pieces. There are many subtleties that will elude even the most sophisticated listener at first. Although it was never Ellington's wish to have his recordings imitated, knowledge of these definitive versions will lead musicians to make more educated choices when creating new performances. Ellington's music, though written for specific individuals, is designed to inspire all musicians to express themselves. In addition, you will hear slight note differences in the recording and the transcriptions. This is intentional, as there are mistakes and alterations from the original intent of the music in the recording. You should have your players play what's in the score.

2. General use of swing phrasing. The triplet feel prevails except for ballads or where notations such as even eighths or Latin appear. In these cases, eighth notes are given equal value.

3. There is a chain of command in ensemble playing. The lead players in each section determine the phrasing and volume for their own section, and their section-mates must conform to the lead. When the saxes and / or trombones play with the trum-

pets, the lead trumpet is the boss. The lead alto and trombone must listen to the first trumpet and follow him. In turn, the other saxes and trombones must follow their lead players. When the clarinet leads the brass section, the brass should not overblow him. That means that the first trumpet is actually playing "second." If this is done effectively, there will be very little balancing work left for the conductor.

4. In Ellington's music, each player should express the individuality of his own line. He must find a musical balance of supporting and following the section leader and bringing out the character of the underpart. Each player should be encouraged to express his or her personality through the music. In this music, the underparts are played at the same volume and with the same conviction as the lead.

5. Blues inflection should permeate all parts at all times, not just when these opportunities occur in the lead.

6. Vibrato is used quite a bit to warm up the sound. Saxes (who most frequently represent the sensual side of things) usually employ vibrato on harmonized passages and no vibrato on unisons. The vibrato can be either heavy or light depending on the context. Occasionally saxes use a light vibrato on unisons. Trumpets (who very often are used for heat and power) use a little vibrato on harmonized passages and no vibrato on unisons. Trombones (who are usually noble) do not use slide vibrato. A little lip vibrato is good on harmonized passages at times. Try to match the speed of vibrato. In general unisons are played with no vibrato.

7. Crescendo as you ascend and diminuendo as you descend. The upper notes of phrases receive a natural accent and the lower notes are ghosted. Alto and tenor saxophones need to use sub-tone in the lower part of their range in order to blend properly with the rest of the section. This music was originally written with no dynamics. It pretty much follows the natural tendencies of the instruments: play loud in the loud part of the instrument and soft in the soft part of the instrument. For instance, a high C for a trumpet will be loud and a low C will be soft.

8. Quarter notes are generally played short unless otherwise notated. Long marks above or below a pitch indicate full value: not just long, but full value. Eighth notes are played full value except when followed by a rest or otherwise notated. All notes longer than a quarter note are played full value, which means if it is followed by a rest, release the note where the rest appears. For example, a half note occurring on beat one of a measure would be released on beat three.

9. Unless they are part of a legato background figure, long notes should be played somewhat *fp* (forte-piano); accent then diminish the volume. This is important so that the moving parts can be heard over the sustained notes. Don't just hold out the long notes, but give them life and personality: that is, vibrato, inflection, crescendo, or diminuendo. There is a great deal of inflection in this music, and much of this is highly interpretive. Straight or curved lines imply non-pitched glisses, and wavy lines mean scalar (chromatic or diatonic) glisses. In general, all rhythmic figures need to be accented. Accents give the music life and swing. This is very important.

10. Ellington's music is about individuality: one person per part—do not double up because you have extra players or need more strength. More than one on a part makes it sound more like a concert band and less like a jazz band.

11. This is acoustic music. Keep amplification to an absolute minimum; in the best halls, almost no amplification should be necessary. Everyone needs to develop a big sound. It is the conductor's job to balance the band. When a guitar is used, it should be a hollow-body, unamplified rhythm guitar. Simple three-note voicings should be used throughout. An acoustic string bass is a must. In mediocre or poorly designed halls, the bass and piano may need a bit of a boost. I recommend miking them and putting them through the house sound system. This should provide a much better tone than an amplifier. Keep in mind that the rhythm section's primary function is to accompany. The bass should not be as loud as a trumpet. That is unnatural and leads to over-amplification, bad tone, and limited dynamics. Stay away from monitors. They provide a false sense of balance.

12. Solos and rhythm section parts without chord changes should be played as is or with a little embellishment. Solos and rhythm section parts with chord changes should be improvised. However, written passages should be learned because they are an important part of our jazz heritage and help the player understand the function of his particular solo or accompaniment. Soloists should learn the chord changes. Solos should not be approached as opportunities to show off technique, range, or volume, but should be looked at as a great opportunity to further develop the interesting thematic material that Ellington has provided.

13. The notation of plungers for the brass means a rubber toilet plunger bought in a hardware store. Kirkhill is a very good brand (especially if you can find one of their old hard rubber ones, like the one I loaned Wynton and he lost). Trumpets use 5" diameter and trombones use 6" diameter. Where Plunger/Mute is notated, insert a pixie mute in the bell and use the plunger over the mute. Pixies are available from Humes & Berg in Chicago. Tricky Sam Nanton and his successors in the Ellington plunger trombone

chair did not use pixies. Rather, each of them employed a Nonpareil (that's the brand name) trumpet straight mute. Nonpareil has gone out of business, but the Tom Crown Nonpareil trumpet straight mute is very close to the same thing. These mute/plunger combinations create a wonderful sound (very close to the human voice), but they also can create some intonation problems which must be corrected by the lip or by using alternate slide positions. It would be easier to move the tuning slide, but part of the sound is in the struggle to correct the pitch. If this proves too much, stick with the pixie—it's pretty close.

14. The drummer is the de facto leader of the band. He establishes the beat and controls the volume of the ensemble. For big band playing, the drummer needs to use a larger bass drum than he would for small group drumming. A 22" or 24" is preferred. The bass drum is played softly (nearly inaudible) on each beat. This is called feathering the bass drum. It provides a very important bottom to the band. The bass drum sound is not a boom and not a thud—it's in between. The larger size drum is necessary for the kicks; a smaller drum just won't be heard. The key to this style is to just keep time. A rim knock on two and four (chopping wood) is used to lock in the swing. When it comes to playing fills, the fewer, the better.

15. The horn players should stand for their solos and solis. Brass players should come down front for moderate to long solos, surrounding rests permitting. The same applies to the pep section (two trumpets and one trombone in plunger/mutes).

16. Horns should pay close attention to attacks and releases. Everyone should hit together and release together.

17. Above all, everyone's focus should remain at all times on the swing. As the great bassist Chuck Israels says, "The three most important things in jazz are rhythm, rhythm, and rhythm, in that order." Or as Bubber Miley (Ellington's first star trumpeter) said, "It don't mean a thing if it ain't got that swing."

GLOSSARY

The following are terms which describe conventions of jazz performance, from traditional New Orleans to the present avant garde.

Break — within the context of an ongoing time feel, the rhythm section stops for one, two, or four bars. Very often a soloist will improvise during a break.

Call and response — repetitive pattern of contrasting exchanges (derived from the church procedure of the minister making a statement and the congregation answering with "amen"). Call-and-response patterns usually pit one group of instruments against another. Sometimes we call this "trading fours," "trad-

ing twos," etc., especially when it involves improvisation. The numbers denote the amount of measures each soloist or group plays. Another term frequently used is "swapping fours."

Coda — also known as the "outro." "Tags" or "tag endings" are outgrowths of vaudeville bows that are frequently used as codas. They most often use deceptive cadences that finally resolve to the tonic or they go from the sub-dominant and cycle back to the tonic.

Comp — improvise accompaniment (for piano or guitar).

Groove — the composite rhythm. This generally refers to the combined repetitive rhythmic patterns of the drums, bass, piano, and guitar, but may also include repetitive patterns in the horns. Some grooves are standard (i.e., swing, bossa nova, samba), while others are manufactured (original combinations of rhythms).

Head — melody chorus.

Interlude — a different form (of relatively short length) sandwiched between two chorus forms. Interludes that set up a key change are simply called modulations.

Intro — short for introduction.

Ride pattern — the most common repetitive figure played by the drummer's right hand on the ride cymbal or hi-hat.

Riff — a repeated melodic figure. Very often, riffs repeat verbatim or with slight alterations while the harmonies change underneath them.

Shout chorus — also known as the "out chorus," the "sock chorus," or sometimes shortened to just "the shout." It is the final ensemble passage of most big band charts and where the climax most often happens.

Soli — a harmonized passage for two or more instruments playing the same rhythm. It is customary for horn players to stand up or even move in front of the band when playing these passages. This is done so that the audience can hear them better and to provide the audience with some visual interest. A soli sound particular to Ellington's music combines two trumpets and a trombone in plungers/mutes in triadic harmony. This is called the "pep section."

Stop time — a regular pattern of short breaks (usually filled in by a soloist).

Swing — the perfect confluence of rhythmic tension and relaxation in music creating a feeling euphoria and characterized by accented weak beats (a democratization of the beat) and eighth notes that are played as the first and third eighth notes of an eighth-note triplet. Duke Ellington's definition of swing: when the music feels like it is getting faster, but it isn't.

Vamp — a repeated two- or four-bar chord progression. Very often, there may be a riff or riffs played on the vamp.

Voicing — the specific spacing, inversion, and choice of notes that make up a chord. For instance, two voicings for G7 could be:

Note that the first voicing includes a 9th and the second voicing includes a 9th and a 13th. The addition of 9ths, 11ths, 13ths, and alterations are up to the discretion of the pianist and soloist.

The Four Elements of Music

The following are placed in their order of importance in jazz. We should never lose perspective on this order of priority.

Rhythm — meter, tempo, groove, and form, including both melodic rhythm and harmonic rhythm (the speed and regularity of the chord changes).

Melody — a tune or series of pitches.

Harmony — chords and voicings.

Orchestration — instrumentation and tone colors.

— David Berger

BONGA

(EMPTY TOWN BLUES)

INSTRUMENTATION

Reed 1 - Alto Sax	*Trumpet 2	Trombone 1	Piano
Reed 2 - Alto Sax	Trumpet 3	Trombone 2	Bass
Reed 3 - Clarinet	Trumpet 4	Trombone 3	Drums
Reed 4 - Tenor Sax			
Reed 5 - Baritone Sax			

*Trumpet 1 is tacet throughout

ORIGINAL RECORDING INFORMATION

Composer: Duke Ellington

Arranger: Duke Ellington

Recorded: January 8, 1963 in New York City

Master Number: 30,206

Original Issue: Reprise R-6069

Currently available on CD: Afro-Bossa / Fantasy 6730

Currently available as digital download: *Afro-Bossa* - itunes.com

Personnel: Cootie Williams, Roy Burrowes, Cat Anderson (trumpet); Buster Cooper, Lawrence Brown, Chuck Connors (trombone); Jimmy Hamilton (clarinet, tenor sax); Russell Procope, Johnny Hodges (alto sax); Paul Gonsalves (tenor sax); Harry Carney (baritone sax); Duke Ellington (piano); Ernie Shepard (bass); Sam Woodyard (drums)

Soloists: Jimmy Hamilton (clarinet); Cootie Williams (trumpet); Buster Cooper (trombone)

REHEARSAL NOTES

Duke Ellington and Billy Strayhorn often used working titles for their composition until they found the appropriate name. Some famous ones are *Shuckin' And Jivin' (Cotton Tail)*, *Anal Renrut* (Lana Turner spelled backwards—which became *Charpoy*) and *Twits and Twerps (Boy Meets Horn)*. Normally the working title did not appear on the issued recording. It's curious to me why the evocative title **Empty Town Blues** did not supplant the cryptic **Bonga**. Never the less the music speaks for itself.

Bonga is 3 choruses of an extended long form C minor blues: 8 bars i, 4 bars iv, 4 bars I, 4 bars V, 2 bars I, 2 bars iv1 bar I, 1 bar iv, 2 bars iv. The second chorus is a clarinet solo with brief answers from the trumpet and trombone soloists. It omits the extension and is 24 bars. The third chorus is a recapitulation of the first chorus with added clarinet and trombone answers and an added vamp to fade ending.

The bass and drum *ostinato* sets up a firm repetitive foundation for the saxes and pep section to sit on. The piano is not part of the groove. His function is to answer the saxes in the first chorus and then is replaced by the other soloists in the succeeding choruses. All the soloists must adhere to the call and response structure. This is the heart of this piece and is much more important than the actual notes.

The saxes need to keep in mind that this chart is a blues. The approach is jazz, not Latin, so that the figure in A4 is swung. Note the bari lead at **D—mf**. The first 3 bars at E are alto lead and **f**, and then back to the bari and **mf**. This is subtle, but adds color.

The pep section (2 trumpets and 1 trombone with plungers and pixie mutes) has the melody on the first and third choruses. Pixies are essential to get the intense pinched straining sound. Intensity and personality are key to playing pep section parts. The idea is to emulate the human voice. Strive for a good balance between the 3 parts. I recommend having a sectional or two to get all the nuance and blues inflection that this music invites. When performing, it would be effective (and in the Ellington tradition) to have the pep section come down front and play the parts from memory.

Letter **J** is in actuality a 2-bar figure that is vamped and faded out in the mix. Because this edition is an exact transcription, I wrote out what was played. In performance you may want to repeat the figure less or more times. There was no official ending; I wrote a downbeat, but you may want to end in some other way.

Bonga is a great example of what Jelly Roll Morton called the Spanish Tinge—the subtle mixture of Afro-Latin music and jazz. In this piece the 2 elements are compartmentalized; the Latin is in the bass and drum *ostinato*, while the rest of the band plays the blues. In the hands of Duke Ellington these two traditions are gloriously made one.

- David Berger

Bonga (Empty Town Blues)

B

The musical score is for a piece titled "Bonga (Empty Town Blues)". It features a variety of instruments: two Alto parts, Clarinet (Cl.), Tenor, Baritone (Bari.), three Trumpets (Tpts. 2, 3, 4), three Trombones (Tbns. 1, 2, 3), Piano (Pno.), Bass, and Drums (Drs.). The score is marked with a rehearsal symbol "B" at the beginning. The Alto parts and Tenor/Baritone parts have dynamic markings of *mf* and *f*, and are marked with a "3" indicating triplets. The Piano part shows chords Fm and Cm. The Bass part has a steady eighth-note pattern. The Drums part has a simple rhythmic pattern. A large red watermark "Preview Requires Purchase" is overlaid diagonally across the score.

The musical score is for the piece 'Bonga (Empty Town Blues)'. It is written for a large ensemble. The top section includes two Alto parts, Clarinet (Cl.), Tenor, and Baritone (Bari.), all playing a melodic line with triplet eighth notes. Below them are three Trumpet parts (Tpts. 2, 3, 4) and three Trombone parts (Tbns. 1, 2, 3). The piano (Pno.) part provides harmonic support with chords Cm, Fm, and Cm. The bass line is played by the Bass and Double Bass (Drs.) instruments, featuring a steady eighth-note pattern. A large red watermark 'Legal Use Requires Purchase' is overlaid diagonally across the score. A key signature change to D major is indicated by a 'D' in a box at the top right, and a 'Solo Dm' instruction is present for the Clarinet part.

Bonga (Empty Town Blues)

Score for **Bonga (Empty Town Blues)**, page 6. The score is for a large ensemble, including Alto, Clarinet (Cl.), Tenor, Baritone (Bari.), Trumpets (Tpts. 2, 3, 4), Trombones (Tbns. 1, 2, 3), Piano (Pno.), Bass, and Drums (Drs.).

The key signature is E-flat major (three flats). The tempo/mood is indicated by the title "Bonga (Empty Town Blues)".

Key musical elements and annotations:

- Alto:** Starts with a forte (*f*) dynamic. A box labeled "E" is above the first staff.
- Cl.:** Features a Gm chord and a complex melodic line with triplets and a trill (*tr*) in the final measure.
- Tenor:** Starts with a forte (*f*) dynamic.
- Bari.:** Starts with a forte (*f*) dynamic.
- Tpts. 2, 3, 4:** Trumpet 3 has a Gm chord and a melodic line with triplets.
- Tbns. 1, 2, 3:** Trombone 1 has an Fm chord.
- Pno.:** Features an Fm chord.
- Bass:** Provides a rhythmic foundation with eighth notes.
- Drs.:** Provides a rhythmic foundation with eighth notes.

A large red watermark "Preview Only" is overlaid diagonally across the page, with the text "Legal Use Requires Purchase" below it.

Bonga (Empty Town Blues)

7

This image shows a page of a musical score for a jazz ensemble. The score is written for the following instruments: Alto, Tenor, Bari., Tpts. 2, 3, 4, Tbn. 1, 2, 3, Pno., Bass, and Drs. The music is in 4/4 time and features various musical notations including notes, rests, and dynamic markings like *mf* and *f*. A large red watermark "Preview Only" is overlaid diagonally across the page.

[illegible]

Bonga (Empty Town Blues)

This musical score is for the song "The Rose Tree" from the musical "The Rose Tree". It is a full orchestral score with vocal soloists and a chorus. The score is written for Alto, Tenor, Baritone, and Bass vocal soloists, and a Chorus (Drs.). The instrumental accompaniment includes Clarinet (Cl.), Trombones (Tbns.), Piano (Pno.), Bass, and Drums (Drs.). The score is in 4/4 time and features a key signature of one flat (B-flat major or D minor). The tempo is marked "Allegretto". The score includes various musical notations such as notes, rests, dynamics (mf, f, sim.), and articulation marks. A large red watermark "Preview Requires Purchase" is overlaid on the score.

Bonga (Empty Town Blues)

Score for **Bonga (Empty Town Blues)**, featuring a rehearsal mark **H** at the beginning.

The score includes parts for the following instruments:

- Alto (Two staves)
- Cl. (Clarinet)
- Tenor
- Bari. (Baritone)
- Tpts. 2, 3, 4 (Trumpets)
- Tbns. 1, 2, 3 (Tubas)
- Pno. (Piano)
- Bass
- Drs. (Drums)

Key musical elements and dynamics include:

- Rehearsal mark **H** at the start of the Alto part.
- Chord markings: **Gm** (Clarinet), **Fm** (Piano), and **Cm** (Piano).
- Dynamics: **f** (forte), **mf** (mezzo-forte), and **mf** (mezzo-forte).
- Articulation: **tr** (trill) and **tr** (trill) markings.
- Tempo/Style: **tr** (trill) and **tr** (trill) markings.

The score is marked with a large red watermark: **Preview Requires Purchase**.

Bonga (Empty Town Blues)

11

This image shows a page of a musical score for a jazz ensemble. The score includes parts for Alto, Tenor, Bari., Tpts. 2, 3, 4, Tbns. 1, 2, 3, Pno., Bass, and Drs. The music is in 4/4 time and features a complex melody with many triplets and sixteenth notes. A large red watermark "Preview Requires Purchase" is overlaid diagonally across the page. A red "X" is also visible over the top right portion of the score.

This image shows a page of a musical score for a jazz ensemble. The score is written for the following instruments: Alto, Tenor, Bari., Tpts. 2, 3, 4, Tbns. 1, 2, 3, Pno., Bass, and Drs. Score for "Bonga (Empty Town Blues)" featuring a variety of instruments and vocals.

Key: J (Jazz)

Instrumentation: Alto, Alto, Cl. (Clarinet), Tenor, Bari. (Baritone), Tpts. 2, 3, 4, Tbn. 1, 2, 3, Pno. (Piano), Bass, Drs. (Drums).

Chord Progression: Dm, Cm.

Tempo/Style: Jazz

Notation: The score includes standard musical notation with treble and bass clefs, key signatures, and time signatures. It features various musical symbols such as notes, rests, and accidentals. A large red watermark "Preview Requires Purchase" is overlaid diagonally across the page.

This musical score is for the piece "Bonga (Empty Town Blues)". It is arranged for a large ensemble. The instruments and their parts are as follows:

- Alto:** Two staves, both playing a melodic line with eighth-note triplets and sixteenth-note runs.
- Cl. (Clarinet):** One staff, featuring a more complex melodic line with sixteenth-note runs and triplets.
- Tenor:** One staff, playing a melodic line with eighth-note triplets.
- Bari. (Baritone):** One staff, playing a melodic line with eighth-note triplets.
- Tpts. 2, 3, 4 (Trumpets):** Three staves, mostly playing sustained notes or rests.
- Tbns. 1, 2, 3 (Tubas):** Three staves, playing sustained notes or rests.
- Pno. (Piano):** Two staves, mostly playing sustained notes or rests.
- Bass:** One staff, playing a rhythmic pattern with eighth notes.
- Drs. (Drums):** One staff, playing a rhythmic pattern with eighth notes.

The score is marked with a large red watermark that reads "Preview Legal Use Requires Purchase".

ESSENTIALLY ELLINGTON

The *Essentially Ellington* High School Jazz Band Program (*EE*) is one of the most unique curriculum resources for high school jazz bands in the United States, Canada, and American schools abroad. *EE* extends the legacy of Duke Ellington and other seminal big band composers and arrangers by widely disseminating music, in its original arrangements, to high school musicians for study and performance. Utilizing this music challenges students to increase their musical proficiency and knowledge of the jazz language. *EE* consists of the following initiatives and services:

Supplying the Music: Each year Jazz at Lincoln Center (JALC) transcribes, publishes, and distributes original transcriptions and arrangements, along with additional educational materials including recordings and teaching guides, to high school bands in the U.S., Canada, and American schools abroad.

Talking about the Music: Throughout the school year, band directors and students correspond with professional clinicians who answer questions regarding the *EE* music. *EE* strives to foster mentoring relationships through email correspondence, various conference presentations, and the festival weekend.

Professional Feedback: Bands are invited to submit a recording of their performance of the charts either for entry in the competition or for comments only. Every submission receives a thorough written assessment. Bands are also invited to attend *EE* Regional Festivals for an opportunity to perform and receive a workshop.

Finalists and In-School Workshops: Fifteen bands are selected from competition entries to attend the annual Competition & Festival in New York City. To prepare, each finalist band receives an in-school workshop led by a professional musician. Local *EE* members are also invited to attend these workshops.

As of May 2012, *EE* has distributed scores to more than 4,000 schools in all 50 states, Canadian provinces and American schools abroad.

Since 1995, over 304,000 students have been exposed to Duke Ellington's music through *Essentially Ellington*.

Competition & Festival: The *EE* year culminates in a three-day festival at Jazz at Lincoln Center's Frederick P. Rose Hall. Students, teachers, and musicians participate in workshops, rehearsals, and performances. The Festival concludes with an evening concert that features the three top-placing bands, joining the Jazz at Lincoln Center Orchestra with Wynton Marsalis in concert previewing next year's *EE* repertoire.

Band Director Academy: This professional development session for band directors is designed to enhance their ability to teach jazz. Led by prominent jazz educators each summer, this companion program to *EE* integrates performance, history, pedagogy, and discussion into an intensive educational experience for band directors at all levels.

JAZZ AT LINCOLN CENTER is dedicated to inspiring and growing audiences for jazz. With the world-renowned Jazz at Lincoln Center Orchestra and a comprehensive array of guest artists, Jazz at Lincoln Center advances a unique vision for the continued development of the art of jazz by producing a year-round schedule of performance, education and broadcast events for audiences of all ages. These productions include concerts, national and international tours, residencies, weekly national radio and television programs, recordings, publications, an annual high school jazz band competition and festival, a band director academy, jazz appreciation curricula for students, music publishing, children's concerts, lectures, adult education courses, student and educator workshops and interactive websites. Under the leadership of Managing and Artistic Director Wynton Marsalis, Chairman Robert J. Appel and Executive Director Greg Scholl, Jazz at Lincoln Center produces thousands of events each season in its home in New York City, Frederick P. Rose Hall, and around the world. For more information visit jalc.org.
