NOTES TO THE CONDUCTOR

"Steampunk" is a term that represents a sub-genre of science-fiction that combines modern technology with 19th century innovations, such as steam-powered vehicles and other similar metallic inventions of that era. The main idea for this piece of music was to combine a heavy metal-style rhythm section with traditional jazz ensemble. The electric guitar takes center stage throughout most of the piece. The guitarist should use any "metal-like" overdrive effect available, as the part is meant to be a heavily overdriven guitar sound. The solo section at m. 108 makes use of C and F Phrygian modes. The Phrygian scale begins on the third degree of any major scale. Here are examples both scales for reference:

C Phrygian Scale

F Phrygian Scale

The soloist should use the notes in these scales as the basis for the solo. The solo may be played on piano if no guitarist is available. Optionally, mm. 108–124 (16 bars) may be repeated if additional soloists are desired.

The fall in m. 50 is long. To be effective, I suggest the ensemble practices playing falls so all parts are heard, but with the lead trumpet determining the duration and speed of the fall.

Regarding articulation, the *marcato* or rooftop accent is played detached and accented. Dynamics are always essential and will make this chart come alive. For example, trombones in mm. 67–68 should exaggerate this dynamic indication. Check out the professionally recorded demo at alfred.com/downloads. Listen and learn the nuances of this arrangement.

Enjoy!
