NOTES TO THE CONDUCTOR

Samba de Ophee is a classic samba by the Brazilian composer Luiz Bonfá. I have long been a fan of Bonfá's music, especially "Gentle Rain," which I released a few years ago on my first CD, *This Time/Last Year*, and is also a Belwin Jazz/Alfred Music publication. I hope you enjoy this version of a wonderful tune. I highly recommend having your students listen to the Alfred demo of this tune to get a great idea of what it can sound like—check out alfred.com/downloads.

I believe the tempo of this tune works anywhere from $\text{♩} = 216$ up to 250BPM. A significant aspect to this chart is for the drummer to capture the "street samba" groove or batucada style for the majority of the piece. The drum part notated is a sketch of what is desired. Check out this YouTube video that really shows some nice instruction on how to approach this marching samba style: <https://www.youtube.com/watch?v=RVwHi5x9I9w>.

The overall feeling of this chart should be happy, upbeat, fun, and festive. After the intro, lead alto and trumpet 2 have the primary melody in a duet or two-part harmony—strive to make sure this is balanced. The rhythm section has some stop-time figures that need to be clean. At m. 21, direct the saxes and trombones to stay dynamically under the melody instruments.

Articulation is critical as always. The winds should emphasize the dynamics and articulations throughout. Make sure that a distinction is made when playing staccato (•) and *marcato* (▲) or rooftop accent. The staccato is played shorter and lightly detached, and the *marcato* is detached and accented.

Measure 46 switches to swing for the bridge and it is most important to swing hard! By that I mean dig into the walking bass line and the ride cymbal on the drumset. Samba is such an energetic style and anything less than a good hard swing will bring the energy way down. As we go back to samba at m. 56, be sure to really exaggerate the dynamics for the first four measures. For the solo section at m. 81, the feel is back in the swing style. Keep the energy level up. The rhythm section volume should not drop down in volume or energy for the solos. Give them support.

We go back to samba at m. 145 with each section getting its own unison line. This will get very heavy if sections play too loud, so direct the sections to back off on the dynamic volume and let the lines flow. At m. 159, exaggerate the dynamics as the chart leads into the shout chorus—it will produce an impressive effect. Trumpets should be big here, and in tune! The rest of the horns should focus on precision. When the saxes play their unison line at m. 169, direct the players to strive to play with a full sound to cut through the rest of the band.

Measure 177 drops in volume and slowly builds to the ending. As each section enters, the band will grow dynamically. Trumpets 1 and 2 alternate lead notes at m. 189—strive to match their sound. The unison line in mm. 198–199 can become heavy, so stress that the players play light. Really punch those last four notes and wait for the thunderous applause!

I had a blast writing this chart. I hope you have a great time playing it! If you have any questions, please just contact me at krisbergjazz.com.

—Kris Berg

**Kris
Berg**

Kris Berg is the director of jazz studies at Collin County Community College, TX. He received his masters and bachelors degrees in jazz studies from the University of North Texas. Under his direction, the Collin jazz ensembles have appeared in Nassau, Bahamas, and festivals throughout the U. S. Mr. Berg is the founder/director of the Collin Jazz Fest and the Texas All-Star Jazz Camp. Mr. Berg's charts have been performed and recorded all over the world, and he is currently active as an artist/clinician for Yamaha Corporation of America.
