PROGRAM NOTES

Throughout the ages, man has created ceremonies, both liturgical and secular, to celebrate human existence. *Rites of Tamburo*, although not specific to any one time period or culture, draws upon this concept of formal celebration. As the title suggests, the piece is centered around the one instrumental family that has transcended the ages. Using percussion for its driving force, the piece is an eclectic blend of various musical styles drawn from many different cultural roots.

NOTES TO THE CONDUCTOR

Rites of Tamburo is playable by both full orchestra and string orchestra (with percussion). If a string orchestra is used, please note that the timpani, mallet, and accessory percussion parts are necessary for a successful performance. The remaining percussion may be added if personnel allows. Please note the liberal use of divisi in the first violins. Feel free to adjust the part assignments to ensure comfort in the higher range.

The opening statement should be as mysterious as possible. Please note the doubling of the mallet line with both bells and vibraphone. If a suitable vibraphone is not available, you may wish to use a synthesizer with an appropriate vibe or music box setting. The first melodic statement in the cello/horns should be chant-like.

The vocal effects in the opening measures should be carefully balanced not to overshadow the mallets and horns. The timpani may require a dynamic adjustment for audibility. The solo violin/flute entrance at measure 11 should be rather strong by comparison. I have scored this line in this register to take advantage of the warm, breathy sound of the flute in this range.

The tempo at measure 20 is crucial. I have noted 152 beats per minute. However, I suggest taking the tempo up to 160 as soon as the orchestra is prepared. The syncopated accents in the strings/woodwinds will require some work for clarity throughout the ensemble. This line is doubled in the marimba. If personnel and equipment permit, add an additional octave in the marimba.

I suggest isolating the ascending line beginning in measure 28. Be sure to rehearse this countermelodic statement to ensure a smooth transition between sections of the orchestra. The line should crescendo as it ascends.

The divisi in the woodwinds in measures 34 and 35 requires the individual assignment of chord tones. Strive for an absolutely even balance in each choir. The pick-a-note effect may require the same type of assignment. Strive for maximum dissonance by using a half step between each player. This effect is dependent upon dynamic shape. Note the piano to fortissimo.

The percussion groove beginning at measure 36 requires careful rehearsal to ensure comfort in the entire orchestra. I suggest beginning in measures 40 and 41. By repeated these two measures, each instrument may be introduced in a rehearsal setting only after the groove is established and comfortable in the preceding parts. The accents in the cabasa are absolutely crucial.

The viola/clarinet statement at measure 44 draws upon the jazz idiom for its inspiration. This allows for a wonderful opportunity to teach style and interpretation. The fugue becomes clear with the violin/flute entrance at measure 52. During the early rehearsal stage, the ensemble may be uncomfortable with exchange of lines. I suggest rehearsing each line separately with the percussion. Once they are comfortable with their "independence," the two lines should fit together nicely.

The fugue returns in a new setting at measure 77. The sforzando/piano effects should be isolated in rehearsal for rhythmic and dynamic continuity. Please note the two eighth notes in the timpani at measure 77. These two notes introduce the low strings/low brass/low reeds, followed by the 2nd violin/trumpets. By isolating these three parts, the orchestra will be comfortable with the sforzando accompaniment as it interacts with the melodic lines.

Please note the optional 8va notated in the flute line. If possible, please add a piccolo double from measure 88 to the end. You may wish to have the flute section play as written if the piccolo is present in order to avoid intonation concerns.

The build beginning at measure 119 is of prime importance. Be sure the timpani solo is audible leading into measure 123. The statement at measure 123 should be as intense as possible. Please note the subito mezzo piano in measure 129. The following crescendo must return to the fortissimo by measure 131. The same dynamic effect is used in measure 134 with the trill in the upper strings/woodwinds. I suggest isolating both of these sections during rehearsal.

I have written *Rites of Tamburo* as a vehicle to provide higher-level musical opportunities without the extreme technical demands required for achievement. I hope you will find this piece to be a wonderfully exciting addition to your repertoire that will allow your ensemble to grow musically.

I hope you enjoy *Rites of Tamburo*. Best wishes for a wonderful performance!
