

COLOR BY INTERVAL

geometric interval designs

by SHARON KAPLAN

Just imagine - a theory book that is artistic in design!

The instructions at the bottom of each page

assign a certain color to a specific interval;

the student colors the intervals

and creates an interesting geometric design.

The book is carefully structured so that intervals

are presented in a logical progression

and then thoroughly reinforced.

Musicians of all ages and all instruments

will enjoy this fascinating way to increase

an important skill. Crayons, markers, colored pencils,

water colors - are all effective.

Mix or match, be creative, enjoy!
