About the Music

“Synergy” March 4

Synergy is the cooperative interaction of two or more entities to produce a greater effect than the sum total of their individual effects. This spirited concert march begins with a crisp melody and bold accompaniment. The middle section features woodwinds and brass separately, with percussion serving as a link between both sections. Finally, the three entities combine again and drive forward to an energetic, synergistic finish.

As with most marches, this work should be played in a bounce style from beginning to end. Placing a slight space between notes will yield a spirited quality. Percussion should perform tastefully at all times, avoiding heavy accents. In measures 13–17, woodwinds should play smoothly for contrast in style.

Court of the Noble Trumpeters 14

Court of the Noble Trumpeters is a ceremonial work for band utilizing the first six notes learned by novice instrumentalists. Because this work features antiphonal trumpets, the trumpet section should be divided into two groups. Group 1 (call) should stand in front of the band and to the conductor’s left. Group 2 (response) should stand in front of the band and to the conductor’s right. Both groups should face the audience. For added splendor, trumpeters may hang colorful pennants from their instruments.

This work uses two dynamic levels: *forte* and *mezzo forte*. The composition also uses two articulation marks: accent and *staccato*. Dynamics, articulations, and breath marks should be demonstrated as indicated in the music.

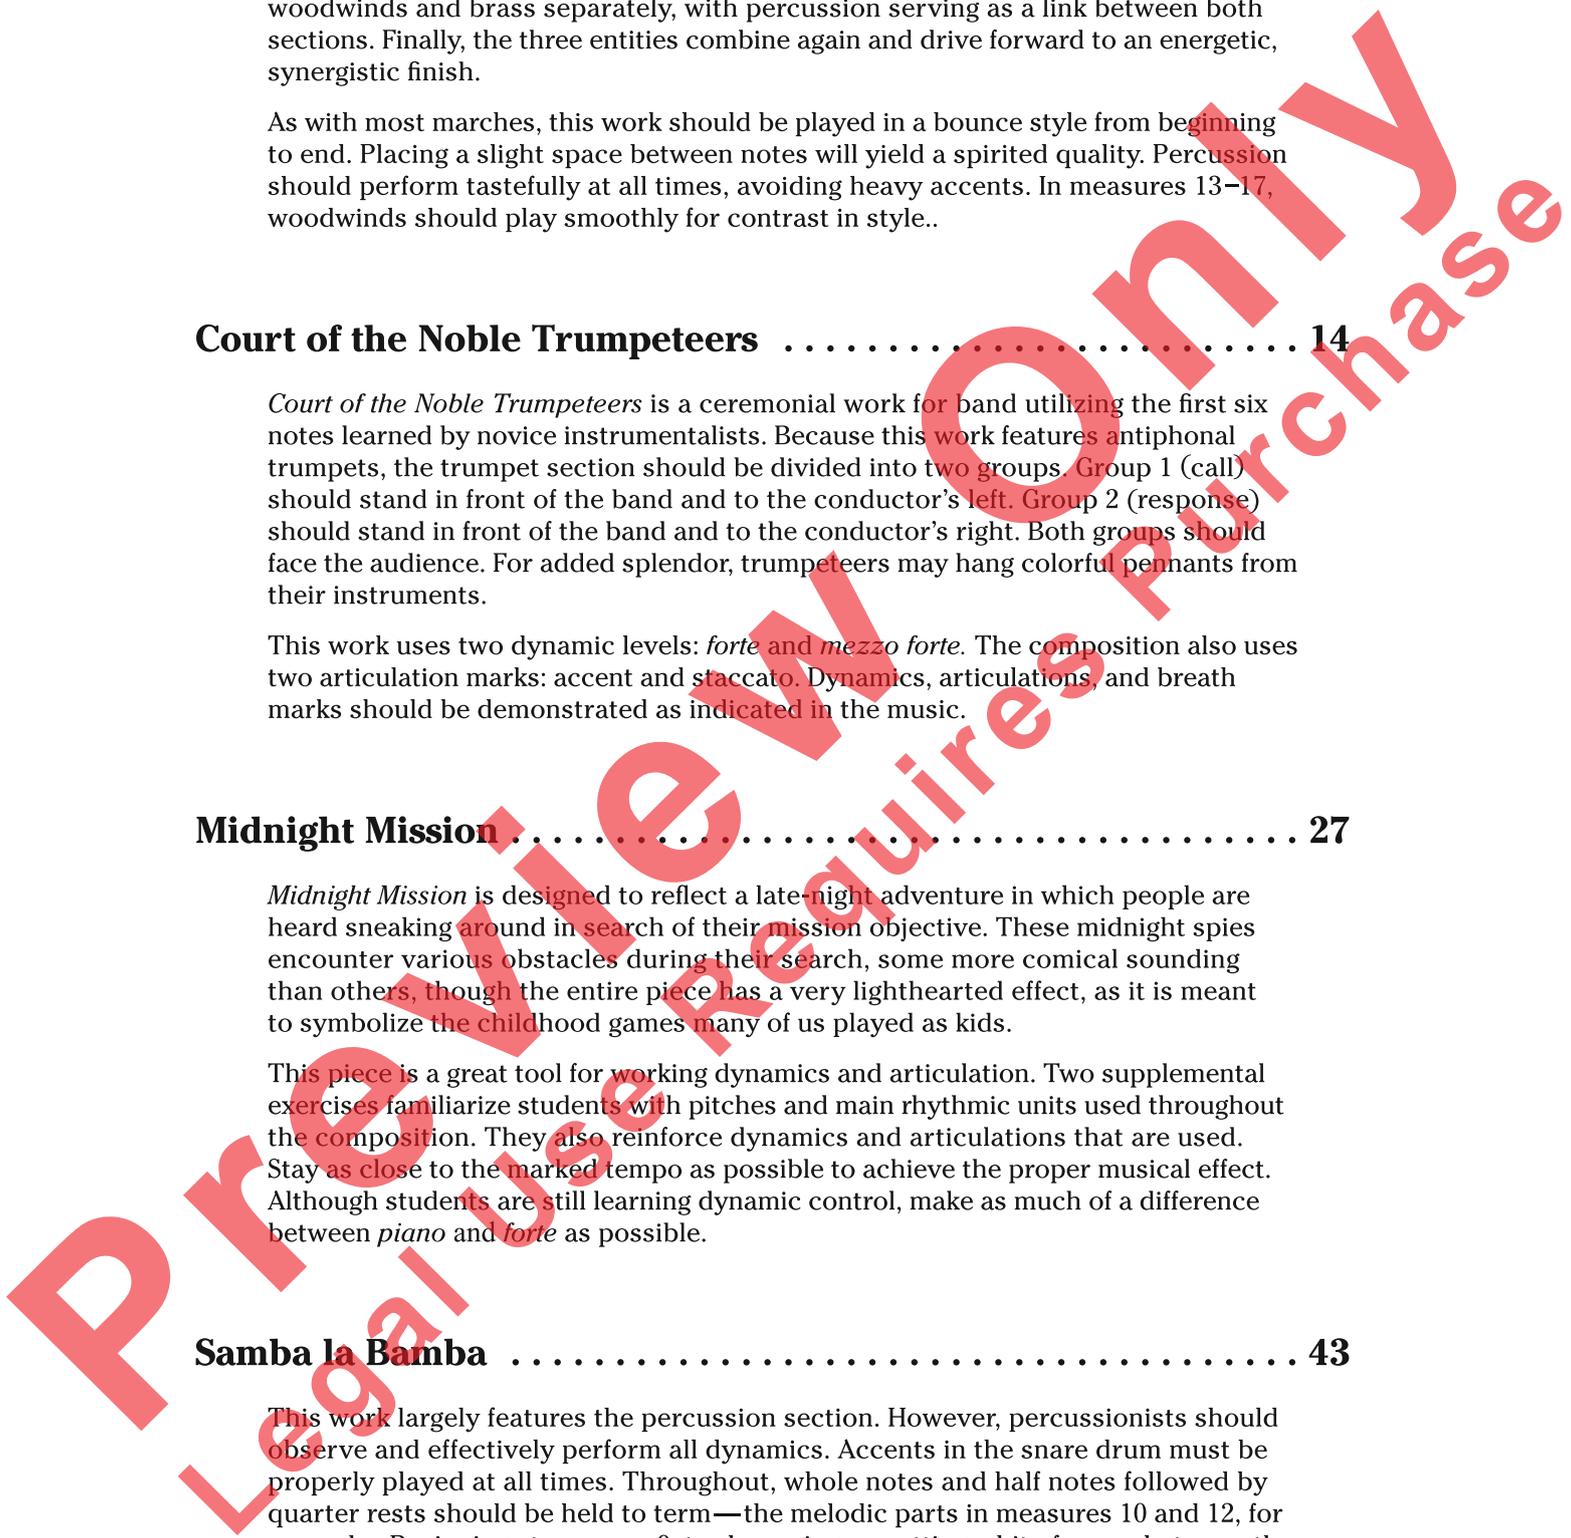

Midnight Mission 27

Midnight Mission is designed to reflect a late-night adventure in which people are heard sneaking around in search of their mission objective. These midnight spies encounter various obstacles during their search, some more comical sounding than others, though the entire piece has a very lighthearted effect, as it is meant to symbolize the childhood games many of us played as kids.

This piece is a great tool for working dynamics and articulation. Two supplemental exercises familiarize students with pitches and main rhythmic units used throughout the composition. They also reinforce dynamics and articulations that are used. Stay as close to the marked tempo as possible to achieve the proper musical effect. Although students are still learning dynamic control, make as much of a difference between *piano* and *forte* as possible.

Samba la Bamba 43

This work largely features the percussion section. However, percussionists should observe and effectively perform all dynamics. Accents in the snare drum must be properly played at all times. Throughout, whole notes and half notes followed by quarter rests should be held to term—the melodic parts in measures 10 and 12, for example. Beginning at measure 9, try bouncing or putting a bit of space between the quarter notes in the low brass and low reeds parts to add excitement to performances.
