About the Music

Originally written for five treble instruments, *Introduction and Allegro* by Joseph Bodin de Boismortier provides a number of opportunities for string orchestra. The opening *Introduction* is a great movement for working on a full-bodied sound and exacting intonation. It is recommended that some work be done without vibrato to tune progressions carefully, using full bows and moderate to weighty bow arms. Using vibrato once solid intonation is achieved will add substantial warmth to the tone colors and harmonic shifts. It is important to note that there is no break between successive half notes. Connection between notes, as well as string crossings, should be played as smoothly as possible.

The *Allegro* may be performed as a full tutti work or in a concerto grosso fashion, utilizing the concertino (solo) and ripieno (tutti) suggestions indicated in the score and parts. This offers the ensemble director an opportunity to feature technically advanced or outstanding individual players while programming the work for a younger group.
